Project: Movie Analysis

Outline

- Business Problem
- Data
- Methods
- Results
- Conclusions

Business Problem

- Microsoft sees the opportunity of creating original video contents and they want to get into the new market.
- They have decided to create a new movie studio.
- The current business pain point is that they don't have much information about this new field and do not know what movies to create
- Business Decisions rely on this project to gain more insights on the movies with the best box office

Business Problem

Business insights to investigate:

- What types of movie contents are created the most(quantity)?
- What types of movies have the highest ratings?
- What types of movies have the best box office gross?

Data
